**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to a method of removing and adding modules in a streaming data path, classified in class 709, subclass 315.
- II. Claim 27, drawn to an interface support commands to determine a media type, to provide notice and to signal, classified in class 709, subclass 328.
- III. Claim 28, drawn to an interface support command to block a data flow, classified in class 709, subclass 328.
- IV. Claim 29, drawn to an interface support commands to perform connection and to manipulate a module in a cache, classified in class 709, subclass 328.

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as an interface having a command to block data flow between processing modules in a streaming data path. See MPEP § 806.05(d).

Art Unit: 2126

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
